PROFESSIONAL SUMMARY

Results-oriented Software Engineer specializing in Data Analysis and Business Intelligence, with a proven track record of transforming complex datasets into actionable strategic insights. Expert in designing interactive, user-centric data visualization dashboards, while leveraging a strong technical foundation in SQL, Python, and Full Stack development to optimize data architecture. Experienced in managing the end-to-end data lifecycle from translating intricate business requirements into technical specifications to deploying scalable backend services and ensuring real-time data integrity. Passionate about bridging the gap between technical engineering and data-driven decision-making, utilizing NLP and advanced analytics to solve real-world business problems within Agile, cross-functional teams.

PROFESSIONAL EXPERIENCE

RISING DIGITAL **İstanbul, Türkiye**
Data Analyst **Dec 2024-Apr 2025**

- Conceptualized and deployed high-impact, interactive dashboards using Power BI and Metabase, converting complex raw data into intuitive visual layouts for internal stakeholders to track Key Performance Indicators (KPIs).
- Conducted deep-dive data analysis to provide actionable insights for strategic business and product development, directly influencing long-term roadmap decisions.
- Collaborated closely with backend engineering teams to ensure data accuracy and optimize the underlying SQL queries, streamlining the data pipeline for real-time reporting.
- Translated evolving business requirements into technical data specifications, ensuring that visualization tools met the specific analytical needs of diverse departments.
- Performed regular data auditing and cleaning to maintain high standards of data quality, ensuring consistent and reliable reporting across all internal platforms.

GÜMÜŞ GROUP **İstanbul, Türkiye**
Front End Developer **Sept 2023-Oct 2024**

- Spearheaded the frontend architecture and development of a scalable e-commerce platform from scratch using Next.js, React.js, and modern JavaScript.
- Leveraged Next.js Server-Side Rendering (SSR) and Static Site Generation (SSG) to enhance SEO performance and optimize page load speeds.
- Integrated RESTful APIs and managed complex application state to deliver a seamless, high-performance product browsing experience.
- Collaborated with cross-functional teams throughout the SDLC to translate business requirements into responsive web features, reducing UI/UX bugs.

DATARİTİM **İstanbul, Türkiye**
Software Developer Intern **July 2023-Sept 2023**

- Processed and visualized complex datasets, preparing data-driven reports for the management team to support business intelligence initiatives.
- Developed the Full Stack architecture and interactive interface of an internal stock tracking application using JavaScript, optimizing the company's inventory management processes.
- Designed and integrated the underlying SQL database architecture to ensure seamless data flow and real-time stock updates.
- Developed Python scripts using Pandas and NumPy to automate the cleaning and transformation of raw inventory data, reducing manual reporting time.

- Optimized complex SQL joins and subqueries within Python environments to handle large-scale data extraction tasks more efficiently.

OKATAN SAĞLIK ARGE A.Ş. **İstanbul, Türkiye**
Artificial Intelligence Intern **May 2023-July 2023**

- Applied Natural Language Processing (NLP) and image processing techniques to support the development of innovative technical solutions.

ROBOTİSTAN **İstanbul, Türkiye**
Front End Intern **Dec 2022-Feb 2023**

- Assisted the development team in implementing responsive user interface designs using HTML, CSS, JavaScript, and WordPress.
- Enhanced website usability and ensured cross-browser compatibility across multiple digital platforms.

KARTELAM.COM **İstanbul, Türkiye**
Full Stack Web Development Intern **May 2022-Dec 2022**

- Spearheaded the frontend development of complex, innovative features from scratch, including a 360° product viewer and QR code generation tools.
- Translated evolving client requirements and feedback into technical user interface updates using React, ensuring the final product met business needs.
- Built and maintained backend services with Golang and Node.js, ensuring seamless API integrations with the frontend architecture.

PROJECTS

Scalable Full Stack Web Application | Lead Developer

- Distributed Content Management System: Engineered a high-performance web application using Next.js, React, and Firebase to centralize and synchronize fragmented digital assets across diverse user environments.
- AI-Driven Data Processing: Architected the integration of Computer Vision (face recognition) to automate complex data categorization and enhance real-time user interaction.
- Advanced Web Architecture: Leveraged Server-Side Rendering (SSR) and Static Site Generation (SSG) to optimize performance and scalability for dynamic, user-generated data sets.

Independent Software Development Projects

- Developed a series of personal projects focusing on Full Stack development, utilizing Node.js to build scalable RESTful APIs integrated with MSSQL and MongoDB for efficient data management.
- Built reusable, accessible component libraries using TypeScript, Tailwind CSS and JavaScript, focusing on delivering seamless and responsive digital experiences across various web platforms.
- Developed Python scripts using BeautifulSoup and Selenium to collect and aggregate pricing data from various e-commerce platforms, providing comparative market analysis.
- Built an end-to-end data pipeline using Pandas, Matplotlib, and Seaborn to analyze historical sales data, identifying seasonal trends and visualizing sales forecasts for business planning.
- Designed and optimized complex SQL schemas for personal data tracking apps, focusing on normalization and query performance to handle large-scale transactional data.

EDUCATION

İSTANBUL AYDIN UNIVERSITY **İstanbul, Türkiye**

Bachelor's Degree in Software Engineering, 2019-2024 (English - 100% scholarship).

CERTIFICATIONS

- **Global AI Hub,** Data Analysis Bootcamp / Certificate, November 2024
- **Alexander Freberg,** Data Analytics Bootcamp / Certificate, November 2024

- **Turkcell Geleceği Yazanlar,** Python 401 / Certificate, May 2023
- **Turkcell Geleceği Yazanlar,** Web Programlama 301 JavaScript / Certificate, January 2023
- **Turkcell Geleceği Yazanlar,** Geleceği Yazanlar Programı React / Certificate, November 2022
- **Microsoft Learn Student Ambassadors**, Get Started with React / Certificate, October 2022
- **MasterStep**, Masters of Sector Bilişim Sektörü / Certificate, July 2021
- **IEEE Manisa CBÜ Computer Society**, Aramızdaki Teknoloji'21 / Certificate, March 2021
- **Etkin Kampüs**, Dijital Çağda Marka İletişimi / Certificate, December 2020
- **Etkin Kampüs**, Girişimcilik / Certificate, December 2020
- **Toptalent Business School**, Leadership Program / Certificate, November 2020

VOLUNTEER EXPERIENCE

GOOGLE DEVELOPER STUDENT CLUBS **İstanbul, Türkiye**
Human Resources **Oct 2022-Sept 2023**

- Orchestrated technical workshops and community events by managing human resources and securing industry speakers and sponsors for peer-to-peer learning.

UNIVERSITY 4 SOCIETY **İstanbul, Türkiye**
Marketing Coordinator **Nov 2020-June 2021**

- Led the comprehensive marketing strategy for 48-hour business acceleration marathons, focusing on technology-based solutions to foster innovative daily life improvements.
